Side-load Garbage Vehicle

NO-WORRY FOR CLEANING GARBAGE CARRIER

Garbage Collection

Garbage Transportation

The H92 is a fully electric side-load garbage vehicle, combining a dustbin turnover mechanism with a garbage loading and dumping system. It is specifically designed for efficient waste transportation in environmental sanitation and cleaning operations, offering an eco-friendly solution for waste management.

Advantage:

- **Sturdy Chassis:** The chassis features a riveted design with vertical and horizontal beams, made from truck-grade special steel, ensuring high strength and load-bearing capacity.
- **Durable Construction:** The car body, lifting mechanism, and rear box cover are built with high-strength, rust-resistant steel for long-lasting performance.
- **Easy Operation:** The vehicle offers high automation and reliability, with a hydraulic manual valve handle to control the bucket lifting, garbage dumping, and loading processes, ensuring simple operation.
- **Large Capacity:** The box has an effective volume of 4 cubic meters, enhancing transportation efficiency.
- **Hydraulic Lifting and Dumping:** The hopper tilts 48° with a front lifting cylinder, and the rear door fully opens hydraulically for complete waste unloading without residue.
- **Leak-Proof Design:** The vehicle is leak-resistant, minimizing the risk of garbage or sewage spillage during operation.
- **Convenient Throwing Window:** A side window allows for easy cleaning of the dustbin and manual disposal of waste.
- **Push Plate Mechanism:** A built-in push plate compresses garbage, optimizing space utilization within the box.

Specifications :

No.	ITEM	UNIT	SPECIFICATION
1	Dimension	mm	4260X1500X2180
2	Passenger	staff/人	2
3	Max Speed	km/h	25
4	Min Turing Radius	m	5
5	Endurance	km	80-100
6	Braking ability	m	4
7	Wheel track	mm	1200
8	Wheel base	mm	2150
9	Ground Clearance	mm	200
10	Climbing	%	25
11	Driving Motor	kw	7.5
12	Oil Pump	kw	1.3
13	Battery Group	v	72
14	Trash Hopper	m ³	4
15	Trash Can	L	120/240
16	Machine weight	kg	2180
17	Rated load	kg	1500

HIGH LEVEL OF AUTOMATION EASY TO OPERATE

Save time and effort

- Automatic lifting and tipping of garbage bins

- Garbage bin can be emptied at once without residue

- The Tailgate can be fully opened

GARBAGE COMPACTOR TO LOAD MORE

No need for multiple trips for dumping Time and effort saving

The interior of the hopper is equipped with a push plate structure

Effective compaction
to carry more
garbage

有效压缩箱体内垃圾提高容积使用
